PROFILE

A data and AI professional with a consulting background and an MSc from London Business School. Over the last two years I have delivered data platforms and analytics for enterprise clients, led delivery and owned client relationships, and built AI and machine-learning products. I combine hands-on technical depth with the business framing to turn ambiguous problems into measured outcomes.

EDUCATION

2025 – 2026 **London Business School, London, UK**

Master's in Analytics and Management · Coursework: Financial Analytics, Data Science for Business, Decision Analytics & Modelling, Generative AI Product Design

2019 – 2023 **SSN College of Engineering, Chennai, India**

Bachelor of Engineering (Electronics & Communication) · First Class with Distinction (CGPA 8.974/10)

EXPERIENCE

2026 – Present **EY (via LBS LondonLAB), London, UK**

Student Consultant

- Sole technical builder of an AI risk-intelligence tool for EY over a synthetic £1.13bn portfolio, engineering a Composite Risk Index and a graph-based model; commended by faculty and presented to the client sponsor.
- Led delivery for a team of five on an Agile board over eight weeks, turning an ambiguous brief into scoped, on-time work.

2025 – 2026 **The Sports Consultancy, London, UK**

Data Consultant (Part-Time)

- Sole data lead for a global sports consultancy: consolidated ~19 years of siloed, unstructured records into a single, analysis-ready asset the commercial team now builds on.

2023 – 2025 **Thorogood Associates, Bangalore, India**

UK-based data and AI consultancy delivering data platforms and analytics for global enterprise clients

Data & AI Consultant

- As developer and de-facto lead (L3 owner) on a live platform for an FCA-regulated ~£6bn fund, ran day-to-day delivery, owned the client relationship as the trusted final check, and delivered 40+ features across cash-flow, XIRR, liquidity and valuation logic.
- Owned a customer P&L data product end to end for a FTSE-100 consumer-healthcare multinational, integrating 18+ data sources into the daily dashboards commercial teams used to make decisions, as sole client contact.
- Automated a manual pricing process into the client's enterprise SAP, removing ~500 hours a year of manual work; separately self-sourced a ~£70,000 opportunity by spotting reusable data nobody had flagged.
- Designed and built 20+ production data pipelines on Azure Databricks, and delivered a three-day SQL and data-modelling training to 40+ new joiners.

PROJECTS & ADDITIONAL INFORMATION

Projects Axiom – a 3-stage ML pipeline over 100k records (K-Means, logistic regression, Gurobi optimisation), reaching 99.7% of maximum economic value.

Zane – a production RAG chatbot (ChromaDB and BM25); CARVIS – a LangGraph AI agent, Top 3 at the LBS AI Agent Cup.

Skills Python, SQL, PySpark; machine learning, statistical modelling, forecasting, optimisation; RAG and agentic AI; Azure Databricks, Power BI; problem-solving, stakeholder management, Agile.

Leadership & Achievements First Class with Distinction (CGPA 8.97); Top 3, LBS AI Agent Cup; Faculty Commendation, EY LondonLAB; NTSE state-level qualifier and school-level ranks in national maths, science and English olympiads (SOF).

President, Q! Quiz Club; Executive Committee, LBS Sports Business & Music Clubs (organised and hosted events, incl. a sold-out showcase at the Notting Hill Arts Club); Panel Speaker, Wembley (2025); Grade 8 Keyboard with Distinction; Volunteer, The Felix Project.
